

FOR IMMEDIATE RELEASE

Time America Chooses Indidge Systems for Software Outsourcing

TEMPE, Ariz.—Time America, a Scottsdale, Arizona based company that is a leading marketer and developer of web-based, client-server and desktop workforce management solutions, has chosen Indidge Systems to outsource software development for an enterprise client project.

Indidge Systems takes advantage of global resources by utilizing both local and offshore software developers to provide dedicated, cost-saving teams to provide a variety of software development and Information Technology consulting services to businesses.

"We selected Indidge's outsourcing model because it is a good fit for our enterprise software development project. Indidge's unique communication practices have allowed us to maintain consistent control over the entire development process," said Bahan Sadegh, Chief Technology Officer of Time America, Inc.

Commenting on the relationship, Naren Koka, Vice President of Indidge stated, "We look forward to working closely with the Time America team to help them meet their development objectives. Our on-site and offshore resources are uniquely positioned to effectively manage the technical and communication requirements."

Indidge provides IT services to Healthcare, Semiconductor, Financial, Legal and High-tech manufacturing industries.

###

About Time America, Inc.

Time America, Inc. (TMAM.OB) has been providing innovative time and labor management solutions since 1988. By leveraging innovative technology, the Company's family of software and hardware solutions helps organizations track and transform basic labor data into strategic information that improves workforce productivity and the utilization of labor resources.
